Summary

Aspiring Data Scientist with hands-on experience in predictive modeling, machine learning deployment, and data-driven decision-making. Seeking to apply technical skills and business acumen to drive impactful solutions.

Skills

Programming Languages: Python, SQL, R, Bash
Machine Learning: Scikit-learn, XGBoost, RandomForest, Logistic Regression, SVM, Clustering, PCA
Deep Learning & Neural Networks: TensorFlow, Keras CNN, LSTM, Transformers,NLP
Soft Skills: Problem-Solving, Analytical Thinking, Team Collaboration

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn
Cloud & Deployment: Flask, Streamlit, Firebase, Render, Docker (basic)
Version Control: Git, GitHub,
Tools & Platforms: Jupyter Notebook, VS Code, Google Colab

Experience

Unified Mentor :**Data Science intern**| February 2025 – April 2025
Developed a machine learning model using Logistic Regression to predict employee attrition Achieved **85% model accuracy** on validation data.
Performed data cleaning, feature engineering, and model evaluation using Python (Pandas, Scikit-learn) Visualized key insights using Matplotlib and Seaborn to assist HR decision-making.
Documented the project workflow and results for internal stakeholders.

Education

RNS Institute of Technology
Bachelor of Technology (B.Tech) in Artificial Intelligence and Data Science
Expected Graduation: 2026 | GPA: 7.0/10.0

Projects

Movie Recommendation System
Python, SQL, PCA, Neural Networks (TensorFlow)
Designed a recommendation engine that improved movie relevance by **35%**
Processed a dataset of **100,000+ movies** and **user ratings** to optimize recommendations

Customer Churn Prediction
Python, Pandas, NumPy, Logistic Regression, Random Forest
Built predictive models to identify at-risk customers with **82% accuracy ,**Analyzed **50,000+ customer records** to detect key churn indicators

Image Caption Generator
Python, TensorFlow, Keras, CNN, LSTM, Flask, Transformers
Built an end-to-end image captioning system that generates descriptive captions from input images. Combined a pre-trained CNN (InceptionV3) for feature extraction with an LSTM-based language model for sequence generation.

Certification

Machine Learning with Python – IBM

Google Analytics Certification - Google Skillshop

Introduction to Machine Learning – Microsoft

Deep Learning – IIT Ropar (NPTEL)
